

MODULAR

| RK Modular
Retail Pods

The background is a solid green color with a repeating pattern of light green line-art illustrations. These include various leaves, a lightbulb with radiating lines, a globe, a dragonfly, a butterfly, a recycling symbol, and a wind turbine. The illustrations are scattered across the top and bottom edges of the page.

We are a proudly independent British manufacturer of Bespoke Modular Solutions. As well as Park Homes and Lodges, we specialise in the off-site construction of accommodation, classrooms, and retail space.

We design, build, deliver and commission on site from our dedicated factory in Northamptonshire.

RK MODULAR

A sustainable step forward for retail design with a open plan space build up of a number of modular builds with updateable branded elements throughout which can used for promotional events, popups, in store activations and campaigns that can be used by brands over and and over again.

Build from sustainable and renewable materials with a solar panel and wild flower roofing system creating a economic, social and environmentally conscious soluation for brands moving forward.

RK Modular
Retail Pods

Flat roof skylight windows
throughout build.

Solar panel and wild
flower roofing system.

Double insulated windows
throughout build.

Air source heat pump and
underfloor heating system.

the RK Service promise

1. Design consultation with our in house Architect
2. Manufacture of modular build in UK at our dedicated factory facilities
3. Transport, siting and services commissioning to on site and Post Delivery Inspection
4. Furniture and dressing of home
5. In house after sales cares

the RK Green promise

CONSTRUCTION AS STANDARD:

Every home is constructed using a high-precision engineered light-gauge steel frame, bespoke specified per build with full tracability. Not only is the steel utilised recycled, it's galvanised for exceptional robustness and longevity. We offer conventional 'on-chassis' builds through direct-to-foundation, including skid (ring-beam) or floating home solutions.

WINDOWS:

We fit A-rated glazing to our windows and doors for the benefit of thermal performance as well as comfort through acoustic and UV reduction.

HEATING AND ENERGY SOLUTIONS:

We recognise that differing scale, usage and locations have varied demands; we seek to optimise the solutions we offer per project – not a one-size-fits all. Working with RK Green Energy Consultancy, we can offer a variety of tailored solutions including:

- Air source and ground-source heat pumps
- Rainwater and Grey water recycling
- Solar to cylinder/grid/storage

AFTERSALES CARE:

While we strive to construct buildings that have potential issues designed and build out, it's important to know that we support all of our products with a factory-based Aftersales response. The importance of your home to you, or holiday let to owner and holidaymaker alike is something we recognise and on the occasions it is required, seek to respond with clarity and promptness.

ENERGY SAVING OPTIONS:

- Air source heat pump
- Solar panels
- Electric heating
- Electric boiler
